

LEVEL I - Map Profiles

EDUCATION & ALERT LEVEL; Open Access.

This level provides first level proximity alerts and education on various Federal Acts, Statutory Laws, Industry Codes, Code of Federal Regulations (CFR, Health & Welfare and Occupational Ethics Violations. These first level profile access points are opened via a map tack profile gateway or directly from an index menu or web page. This information provides no identification of the alleged perpetrator and the tack is not placed on the perpetrators business or home but within 1 kilometer of the location were alleged repeating violations occur.

Level I Public Safety Information & Level II Profile Access Point.

This process allows the public to alert one another of public safety risks and gain knowledge on relevant laws and ethical breaches on specific illicit professional or business practices that are directly relevant to locations and circumstances. Direct evidence is often added to the second and third level perpetrator profiling system. Those submitting ethical breaches or legal violations are proved resource to submit their complaints to state occupational licensing boards, Watchdog Websites such as Yelp®, Rip-off Report® and when necessary various state affiliated protective agencies and law enforcement.

Level I Profile - Access Point Through Proximity-based Map Tack.

LEVEL II - Map Profiles

EVIDENCE & INVESTIGATION; Password Access.

Password protected level 2 access specifically names the alleged perpetrators and provides actual objective proof/empirical direct evidence of the civil breaches or crimes suspects have allegedly committed. White-collar crimes are documented via paper trails over periods of time (unlike blue collar crime which often occurs in the heat of passion often without calculation and forethought), court documents, news articles, victim statements, witness accounts, and more frequently recordings (in one party consent States), video and/or photographs.

Professional/Industry Rotating Map Tack Icons Represent White-collar Professionals Working In-concert/Collusion.

Password access to law enforcement, public servants, government agencies and news publishers whose duty it is to provide, legislate policy or inform citizens of public safety matters:

1. Law Enforcement & Prosecutors: first priority password authorization access always provided. If law enforcement is unable to respond to alleged criminal conduct demonstrated through the evidentiary evidence provided then level 2 password access will be provided to,
2. Public Representatives & Government Agencies: in most cases public servants will be supplied second level password clearance if requested then,
3. New's Publishers: level 2 through 3 password access may be provided to the mainstream news publishers when it presents a public safety risk then,
4. Victim advocacy organizations and established Web Publishers: password access on a need to know public safety bases then,
5. Internet Publishers, password access on a need to know public safety bases after items 1 through 4 have provided no response,
6. Social Media: passwords will not be supplied through social media, until information becomes public or court adjudicated announcements have determined guilt. Social Media will be actively used to post Level 1 education and alert messages, crowd-sourcing and general public map tack placement profile requests, as well as, *Sherlock AI*™ queries in tandem with public safety campaigns and field gathering via *Whistleblower Mobile Apps*.

The data and empirical evidence contained in level two access point is information that is protected and flagged to not be indexed, followed, or crawled by any search engines or disseminated in any way via Social Media unless the information becomes public knowledge via other media publications, victim rights advocacy or public safety watchdog organizations such as Yelp® or Rip-off Report®. If a suspect perpetrator is facing charges and a trial for any of their alleged civil or criminal activities their map tack, Level 1 and Level 2 profiles are immediately removed from the online profiling system, AI curator system and all data servers. If the perpetrator is adjudicated guilty of any offences, then their profile returns and is made public with the results of their adjudication. If white collar professional or blue-collar criminal is found innocent, then their data remains off the internet. All data remains in the offline relational database in the event of affiliates source civil or criminal research and future public safety offences.

LEVEL III - Map Profiles

RESEARCH & ANALYSES; Password Access.

Request additional documentation about level 3 research, Citizen Safety Maps integrative APIs, *Sherlock AI*™ machine curation, *AEGIS Reports*™, *WhistleField*™ Mobile App customizations, collaborative investigations, transparency organizations and public safety projects.
